

Certified Mail

Midwest Presort offers a certified mailing solution that streamlines the current process, expedites mail, enhances tracking of mail pieces, and captures delivery/signature confirmation, all while reducing overhead cost!

- **No software to purchase**
- **No forms to complete or green cards to fill out**
- **No monthly fees**
- **Reduced certified postage costs**

Purchase envelopes and mail transactions directly from Midwest Presort on an as-needed basis. All transactions are processed by each user right at their desktop and are stored indefinitely under a personal company username for future reference/follow-up. Specialized cover sheets are user-printed with all unique recipient information and required USPS information to ensure timely and accurate delivery. Signature confirmation is captured electronically and can be emailed directly to the operator. Less time is spent processing certified mail and tracking delivery signatures, resulting in reduced overhead costs. Plus, the final cost (including the envelopes and transaction click charge) is less than personal certified postage costs today!

Large batch mailings using Excel or CSV address lists can also be processed. There's even a PDF address extraction tool that allows each user to extract recipient address information from existing PDF documents for the purpose of creating the certified mail address cover sheets.

Contact Midwest Presort today and see how easy & cost effective sending certified mail can be using this solution!
